$ 12.50

Understanding Indian Civilization is essentially an essay in methodology. In this the author critically examines a number of frameworks of enquiry which have been used in arriving at macro and micro profiles of Indian Civilization. He then turns to a number of hitherto unused approaches that could be fruitfully employed in attempts to understand the complexity, the diversity and the variety of cultural forms both in continuity and in change. He Pleads for a synthesis of the approaches of a variety of disciplines including Indology, archaeology, history, philosophy, sociology, and social anthropology . Taking selected aspects of Indian civilization he illustrates how the approach developed by him can be used.

This volume deals primarily with methodology and is a pioneering effort in problem-oriented research. Most meaningfully, cogently and in a very readable style it produces a broad theoretical basis for the comprehension of archaeological material within the framework of anthropology for the first time bearing upon Indian civilization. It makes a timely, in face a long overdue, plea for broad contextual issues raising crucial questions that help construct a total picture of the life of early peoples of India. It has produced a model for cultural evolution in south Asia.

Still No Trace of an Aryan Invasion: A Collection on Indo-European Origins / Koenraad Elst

The question of the Homeland of the Indo-European (IE) or “Aryan” language family is, as riddles in the otherwise prosaic field of historical linguistics go, of unusual importance. It pits essentially two theories against one another. Either ancestral Proto-Indo-European (PIE), mother of most Indian and European languages, was spoken in Northwestern India, some 6000 years ago. This was the dominant view for some forty years after the close kinship between these languages had been announced by William Jones in 1786. It was revived amid lots of commotion around 1990, and since 1996 it is known as the Out-of-India Theory (OIT). Alternatively, it was spoken outside India, in Homelands ranging from Bactria to Anatolia, but now most popularly accepted to have been Southwestern Russia. As these more westerly Homelands all imply that the Indian branch of this language family had entered India from abroad, probably some 3600 years ago, this alternative is called the Aryan Invasion Theory (AIT), or with a more recent weasel word, the Aryan Migration Theory (AMT). This theory has led to the grossest political abuse: by British colonialism, by German National-Socialism, and even now by Dravidianism, Ambedkarism and other “Breaking India” forces. Nevertheless, most scholars still swear by it because they assume that someone somewhere must have proven it, otherwise it wouldn't have become the official theory. But this assumption is in need of verification. Over the years, Dr. Koenraad Elst has devoted a number of scholarly papers and journalistic articles to this controversy. For easy future reference, they have been collected here.

The Harappans and Aryans / M. K. Dhavalikar

There is a heated debate from the day the Indus or the Harappan civilization was discovered: whether it was Aryan or Dravidian. The flow of the new data is continuous, and the controversy is becoming acrimonious. It appears that a Tsumani-like calamity forced Harappans to migrate to other regions in the country for sustenance and even beyond it. The problem that has now
cropped up is whether the Harappans and Aryans were two different people or one and the same for the simple reason that the latter reach the very same regions where the Harappan presence is also marked, the former evidenced by Harappan artifacts and the latter by an IA language because Max Muller has certified that whosoever speaks an IA language is an Aryan. This was not a hide-and-seek game, but points to their being one and the same people. What is more, these migrations are corroborated by allusions in the later Vedic literature. The study analyses all the new evidence and shows how it has contributed to the make up of Indian civilization and discusses how it can prove useful to bridge the hiatus between the protohistoric and the historical periods.

Anyone who is surprised that with so many historians already in the field on Alexander it should have occurred to me to compose this history, should express his surprise only after perusing all their works and then reading mine”, remarked Arrian in the second century AD. Today after 1900 years the trend on Alexander is the same. Books on Alexander continue to appear, all written mainly by the Western scholars. No dearth of works has resulted in giving birth to many faces of Alexander. The justification furnished by each of them for their Alexander is not much different from Arrian's time.

$ 70.00

The human society offers a vast field of study in any context, and for this volume of essays devoted to the study of ancient Indian society we have selected only a few of its aspects. The first essay is an introduction to the modern anthropological studies on caste whereas the second one is a detailed study of how the ancients perceived the caste differences through time and how the complexity of the system was matched even in the ancient context by some of the complexities that one observes today on the ground. The third essay is basically about the rural and urban contexts in which the caste system operated.

The global financial crisis has proved that economic realities are very different from the traditional assumptions of macroeconomics. Macroeconomic Policies for Emerging and Developing Economies provides a contemporary analytical account and discusses the current debates on the theory and practices of macroeconomic policies of developing economies emerging from the crisis. It deals with issues relating to openness, capital flows and exchange rate policies as well as macro-financial policies. It underscores two important points: the need to design a development strategy that takes into account the economic context of the countries concerned, and for well-regulated macro-financial policies that would help promote the objects of sustainable growth with price and financial stability. This engaging and unrivalled guide to macroeconomic policy goes beyond the standard macroeconomists' tool kit of monetary, fiscal...
and exchange rate policies and includes topics such as development strategies and macro-
financial policies.

Professor Kesavan Veluthat, in a significant departure from the existing scholarship, represented by K.A. Nilakanta Sastri, T.V. Mahalingam, and Elamkulam P.N. Kunjan Pillai, explored aspects of historical transition, political structures, settlement patterns, agrarian relations,
religion, and ideology in early medieval Tamil Nadu and Kerala, thus changing the terms of the debate and reconstructing the study of South Indian history in ways that are irreversible. His more recent studies in the literary and intellectual traditions of Kerala have, by their ingenuity and provocativeness, overturned long accepted historiographical positions.

The present volume deals with the history, culture and social life of Burhanpur since its inception. Founded by Faruqi ruler Nasir Khan in 1407, the city was the capital of the Faruqi kingdom for two centuries, till its occupation by the Mughal emperor Akbar at the close of the 16th century. The Faruqi rulers were quite tolerant by the standards of those times and consequently Burhanpur gradually became a centre of the Sufi saints who came and settled here from all parts of the country.

Pondicherry under the French: Illuminating the Urban Landscape, 1674-1793 explores how the town of Pondicherry developed as the epicentre of the French presence in India, becoming a major centre of Company administration. It evaluates the relative significance of inland trade and overseas commerce in generating mercantile wealth by examining the volume and value of commercial transactions and the interactions between the French, Tamils, Telugus, Gujaratis and the Armenians. This resulted in the urbanization of the town, which in turn dramatically and radically changed its skyline. The collective composition of the external agencies, cross-cultural connections and knowledge networks led to new forms of art, architecture and culture with the French attempting to convert the urban reality of Pondicherry into a smart city. As the French presence evolved from a trading company into a colonial state, Pondicherry, called 'The Pearl of French India', became one of the most advanced cities in the world in terms of governance, politics and global linkages.

If you insist that you do not know me, let me explain myself … you will feel, why, yes, I do know this person. I’ve seen this man.

With these words, Manoranjan Byapari points to the inescapable roles all of us play in an unequal society. Interrogating My Chandal Life: An Autobiography of a Dalit is the translation of his remarkable memoir Itibritte Chandal Jivan. It talks about his traumatic life as a child in the refugee camps of West Bengal and Dandakaranya, facing persistent want—an experience that would dominate his life. The book charts his futile flight from home to escape hunger, in search of work as a teenager around the country, only to face further exploitation. In Kolkata in the
1970s, as a young man, he got caught up in the Naxalite movement and took part in gang warfare. His world changed dramatically when he was taught the alphabet in prison at the age of 24—it drew him into a new, enticing world of books. After prison, he worked as a rickshaw-wallah and one day the writer Mahasweta Devi happened to be his passenger. It was she who led him to his first publication.

In this first critical edition of the legal treatise of Visnu (Visnu Smrti), Olivelle locates the text geographically in Kashmir and dates it to around the seventh century CE based, among other factors, on the iconographic description of Visnu. The text was composed by a scholar who belonged to the Kathaka Branch of the Yajur Veda and who was also an adherent of the Vaisnava Pancaratra tradition. This is the only legal text that shows a deep influence of the bhakti tradition. Although the Visnu Smrti did not have as illustrious a life as the treatises of Manu and Yajnavalkya, we find it cited frequently in medieval legal digestes. Indeed, unlike citations from other Dharmasastras, medieval authors regularly cite entire sections of this treatise, indicating that they were familiar with a text more or less identical to the one that has come down to us. Consisting of 100 chapters, the text is framed as a conversation between Goddess Earth and Visnu, with Earth requesting the dharma that should govern the lives of those belonging to the four varnas. Originally published in the Harvard Oriental Series, this Indian edition will hopefully make this important text available to a wider Indian audience of scholars and students.

A temple is an embodiment of the universe, it is all encompassing. There is much beyond what can be seen through the eye and this book has succeeded in providing a holistic understanding of the multi-layered fabric of the Udayesvara temple of Udayaditya Paramara. It is indeed intriguing that the Paramaras were involved not only in building temples but also in formulating the canons for their architecture. As a result, we come across a unique style of temple architecture which was not seen before the ascendancy of the Paramaras. In this context, one
often encounters representations which are enigmatic both in terms of iconography and the underlying philosophy.

The book attempts to recapture the material milieu, spiritual anchorage and power and authority of Saiva Siddhanta ascetics in the Vindhyan woodlands of central India during the early medieval times. In doing so, it also highlights contradictions that coupled renunciation with acquisitive monasticism, piety with power, and militancy with asceticism. The details tend to betray territorial ambition of the renounces who carved out a vast network of prosperous mathas the spectacular structures generally ignored in our studies so far- as their strongholds amidst the raw and hazardous woodlands (atavis) lived by indomitable autochthons (atavikas). The book highlights the renouncer-woodlander coalition institutionalized under the monasteries, temples and sculpture. Sculptures among these, in particular, portray queer female deities, fierce goblins, banshees and ascetics too, all integrated with conventional divinities, which composed the Saiddhantika monastic art and architecture.

The Rashtriya Swayamsevak Sangh and its affiliated groups - usually known as the "Sangh Parivar" - are the most powerful organisations in India today. But as what they stand for, and you will get two very different answers. Starting with the RSS’ own texts, and exploring its history and the relationship between its beliefs and Indian politics, the book tries to answer two key questions: what does RSS and its affiliated groups actually stand for, and what does their rise mean for India’s future?

Nepal is geo-strategically located between the two main drivers of the new Asian Century-India and China. While China has already reserved a seat at the global high table, India will soon reclaim its place there. Both Indian and China will reshape the global political, economic and strategic order in days to come.

The Look East Policy which India unveiled in 1991 has now been superseded by Act East Policy which has ASEAN centrality as its core. The Mekong-Ganga Co-operation (MGC) is an initiative by six countries: India and five ASEAN countries, namely Cambodia, Laos, Vietnam, Myanmar, and Thailand for co-operation in tourism, culture, education, and transport and communications. It was launched in 2000 at Vientiane, Laos. Both the Mekong and Ganga are civilizational rivers, and the MGC initiative aims to facilitate closer contacts among the people inhabiting these two major river basins.
