Analysts of government have frequently noted how Singapore's policies are grounded in rigorous economics thinking. Policies are designed to be economically efficient even if they are not always popular. This pioneering book takes a different approach. It aims to demonstrate how successful policies in Singapore have integrated conventional economic principles with insights from the emerging field of behavioural economics even before the latter became popular. Using examples from various policy domains, it shows how good policy design often requires a synthesis of insights from economics and psychology. Policies should not only be compatible with economic incentives, but should also be sensitive to the cognitive abilities, limitations and biases of citizens. Written by policy practitioners in the Singapore government, this book is an important introduction to how behavioural economics and the findings from cognitive psychology can be intelligently applied to the design of public policies. As one of the few books written on the subject, it promises to stimulate wider interest in the subject among researchers, policymakers and anyone interested in the design of effective public policies.

Islamic Banking and Finance in South-East Asia by Angelo M Venardos has been a "must read" since its first edition in 2005 and has already been translated to Arabic.

Now in its 3rd edition, the book offers important updates you can look forward to, starting with the foundations of Islamic banking, developments and issues. The reader is then treated to a timely survey of Islamic banking in five South-east Asian countries. Most of these chapters have been completely revamped from the last edition. One additional chapter has been added on Islamic Succession Planning, which introduces an increasingly essential aspect of Muslim life — that of managing one's wealth now and in the afterlife.

Whether you are new to the topic or a practitioner in the industry, you will appreciate the accessible way in which the book is written. According to the Asian Journal of Comparative Law, the book gives a broad overview yet "manages to achieve this in a rather slim volume while providing depth of analysis at the same time".

Studies in East Asian Economies : Capital Flows, Exchange Rates and Monetary Policy / Jagdish Handa & Shibeshi Ghebre Kahsay

Singapore: World Scientific Publishing Co. Pte. Ltd., 2012

xi. 271p. ; 23cm.

ISBN-13: 9789814338943

\$ 95.00 / HB

538 gm.

This book includes three economic/econometric studies on four East Asian countries (Indonesia, Malaysia, Philippines and Thailand) and two studies on China. The four East Asian economies, designated at one time as 'economic tigers', provide important and interesting case studies on periods of very rapid growth with heavy capital inflows, followed by financial and economic crises. The three studies on these countries examine the impact of heavy capital inflows on growth, real exchange rates and the conduct of domestic monetary policy during the period 1970–96, which immediately preceded their financial crises of 1997–98. At a more general level, they shed light on the contributions that capital inflows make to small open economies and how these inflows impact on their exchange rates and monetary policies.

With rapid development of China's economy in the past decades, there arises a great

demand for a comprehensive report concerning the state of logistics development in China. Yet to date, only brief, fragmented writings in English exist. "Contemporary Logistics in China: An Introduction" is the first systematic, objective and authoritative publication based on the work of experienced researchers from the Logistics Research Center at Nankai University.

This book contains both a panoramic overview of logistics developments in China to afford a broad understanding, as well as specific, in-depth analyses of various logistics sectors, enterprises, policies, and current issues in China. Readers will find this book a valuable reference of relevant and well-founded information on logistics developments in China.

2. China-Economic conditions – 2000-
3. China – Economic policy – 2000-
4. China – Foreign economic relations

\$ 54.00 / HB

536 gm.

After the 1978 Economic Reform, China's economic development has been on a fast track ever since. Later on, the successful accession into the WTO in 2001 accelerated China's economic transformation and made it more integrated with the world. Today, as the second-largest economy in the world, China has earned herself a leading role on the world stage beyond dispute. This book provides readers with answers to why and how China functions as a leader in the world economy.

This book surveys China's economy in four parts — economic institutions, economic problems, economic policies and economic analyses. It is based on the author's latest findings from his scholarly research on China's economy, his involvement with China's economic reform and development, and his personal contacts with Chinese academics,

entrepreneurs, government officials and ordinary citizens for over thirty years. The book is written in a style accessible to the general readers, since most chapters are based on articles published in three major Chinese newspapers, of which the author is a columnist. It can also serve as a reference book for professionals, an authoritative guide for general readers and a supplementary text for university students. The author uses it as a supplementary text for his course on the Chinese economy at Princeton University.
