Europe and China: Strategic Partners or Rivals? / Edited by Roland Vogt
Hong Kong : Hong Kong Universities Press, 2012

Casting new light on Sino-European relations, this volume challenges the official rhetoric of "constructive engagement" and "strategic partnership" between Europe and China, by revealing the internal and external limitations and constraints of their interaction. The contributions illustrate that Europe and China are not static, monolithic, and unitary entities. Sino-European relations are becoming a complex web of economic, diplomatic, social, and cultural interlinkages and are driven by numerous actors with often diverging interests. While trade has been a dominant factor in this relationship, Europe and China are now tied together by more than commercial exchanges. Concerns about energy and climate change, human rights and policies towards Africa, geostrategic considerations, as well as a pervasive anxiety about China's rise in Europe are now important elements of this relationship. In the absence of common borders or strategic interests in each other's regions, Sino-European affairs are cordial and friendly, but also remain distant and vague. The growing quantity of interactions has so far not led to a qualitative upgrade of the relationship. Both sides continue to be secondary partners to each other. Misperceptions, false expectations, and a general lack of understanding of each other's internal drivers of policy continue to be major obstacles for improving ties between Europe and China.

China and Its Second Rise : Myths, Puzzles, Paradoxes, and Challenge to Theory / James C. Hsiung
Singapore: World Scientific Publishing Co. Ptd. Ltd., 2012
xx. 319p. ; 23cm.

This book seeks to demystify the re-ascendancy of China as a civilization state. China's politics and society are examined in the light of its living civilization, which is the only one of the ancient civilizations that has survived to this day. The book also contrasts China's development with that of the West and Japan. By combining the impact of internal political and socio-economic developments in China and its external relations (from the silk routes, the tribute system, to the modern day), it unravels the existing myths, puzzles, and paradoxes surrounding China and questions the adequacy of most

of the Western political theories (such as realism in international relations) in an attempt to explicate China's re-emergence as a world power. It attempts to tackle squarely the question: Is China a threat to world order?

The China Wave : Rise of A Civilizational State / Zhang Weiwei

This is a best-seller in China and a geopolitical book for our times. As a leading thinker from China, Zhang Weiwei provides an original, comprehensive and engrossing study on the rise of China and its effective yet controversial model of development, and the book has become a centerpiece of an unfolding debate within China on the nature and future of the world's most populous nation and its possible global impact. China's rise, according to Zhang, is not the rise of an ordinary country, but the rise of a different type of country, a country sui generis, a civilizational state, a new model of development and a new political discourse which indeed questions many of the Western assumptions about democracy, good governance and human rights. The book is as analytical as it is provocative, and should be required reading for everyone concerned with the rise of China and its global implications.

The foreign policy of small states is an often neglected topic, which is particularly the case when it comes to Suriname. How did the young Republic deal with its dependency on the Netherlands for development aid after 1975? Was Paramaribo following a certain foreign policy strategy or did it merely react towards internal and external events? What were the decision-making processes in defining the foreign policy course and who was involved in these processes? And why was a proposal discussed to hand back the right of an independent foreign and defence policy to a Dutch Commonwealth government in the early 1990s? These questions are examined here in depth, in the first comprehensive analysis of Suriname's foreign policy from 1975 to 1991. The book provides readers interested in Caribbean and Latin American affairs with a detailed account of Suriname's external relations. Moreover, the young Republic may stand as a case study, as it confronted the difficulties and challenges that small developing states often face.
