<https://www.marymartin.com/web?pid=917332>  
*The Myanmar Statistical Yearbook 2024 offers a comprehensive and updated collection of statistical data on Myanmar's demographics, geography, and socio-economic conditions. Designed for both national and international audiences, this publication serves as a vital resource for understanding the country's progress, challenges, and opportunities. The data in this Yearbook are primarily derived from administrative records maintained by relevant ministries, departments, enterprises, and private agencies. Additionally, it incorporates results from various censuses and surveys conducted by government ministries and the Central Statistical Organization (CSO). Key demographic insights are based on sources such as the 2014 Myanmar Population and Housing Census, the 2019 Inter-Censal Survey, and household migration data from the Myanmar Living Conditions Survey 2017, ensuring a robust and reliable foundation for analysis. This 2024 edition introduces time series data, enabling users to observe trends and changes over the years. The Yearbook also includes detailed methodologies, a glossary, and an analytical index to enhance usability. These features are designed to provide greater clarity, improve data discovery, and meet the diverse needs of users.*
