Taxation of Legal Costs in South Africa / R Francis-Subbiah
South Africa: Juta, 2014

492pp.

9780702199974

\$ 65.50

Taxation of Legal Costs in South Africa provides clear and practical guidance on taxation of costs, which will assist in determining reasonable costs in line with the existing legal system. Taxation is about the quantification of legal costs and therein lies the crux of any costs issue. The book explains how the process of taxation exercises control over costs that are legally recovered so that fees and costs are reasonable. Taxation of Legal Costs in South Africa identifies the key aspects of costs and all aspects of taxation. It records and integrates the practices, rules, tariffs and judgments of court to provide a practical resource. The discretion that is applied in taxing bills of costs and the principles relied upon in reviewing taxations are discussed extensively. The book analyses maximum tariffs that legal practitioners may charge, which have a significant impact on both the public and the legal profession. The author also offers practical suggestions for solutions to challenges that arise in practice.

Perspectives on the Law of Partnerships in South Africa / J J Henning
South Africa: Juta, 2015
336pp.
9781485106401
\$ 58.00

Perspectives on the Law of Partnership in South Africa examines the most problematic issues in the law of partnership. It investigates specific issues in the area of partnership law, painting a broader picture of all the other relevant areas involved. In following a 'perspectives' approach - presenting a historical and a comparative perspective - the book offers a detailed consideration of complex areas of partnership law while at the same time exploring the law in general. Topics discussed range from the history and development of partnership law to perennial classical favourites such as the leonine partnership, the triple contract and universal partnership proper, all three of which contributed to the delineation of the partnership concept. Aspects of the law in general that are discussed in detail include: Legal status and its attendant entity and aggregate theories, representation and mutual

mandate, partnerships en commandite, anonymous, limited and limited liability partnerships, the removal of the limit on the number of partners, partnership sequestration, the dual priorities rule. Perspectives on the Law of Partnership in South Africa is offered as a scholarly book for the subject specialist with the expectation that it will also invigorate interest in and advance research on the law of partnership.

Private Law and Human Rights / E Reid, D Visser (Editors)

South Africa: UCT PRESS, 2014

575pp.

9781775820451

\$ 74.50

Scotland and South Africa are mixed jurisdictions, combining features of common law and civil law traditions. Over the last decade, a shared feature in both Scotland and South Africa has been a new and intense focus on human rights. In Scotland the European Convention on Human Rights now constitutes an important element in the foundation of all domestic law. Similarly, the Constitution of the Republic of South Africa, adopted in 1996, has as its cornerstone a Bill of Rights that binds not only the legislature, the executive, the judiciary and all organs of state, but also private parties. Of course, the 'constitutional moments' from which these documents sprang were very different and the Scottish and South African experience in some aspects could not be more dissimilar. Yet in many respects the parallels are close and compelling. This book, written by experts from both jurisdictions, examines exactly how human-rights provisions influence private law, looking at all branches of the subject. Moreover, it gives a unique perspective by comparing the approach in these kindred legal systems, thus providing a benchmark for both.

South Africa: Juta, 2014

468pp.

9781485106142

McKenzie's law of building and engineering contracts and arbitration is an essential reference for those connected with the construction industry. It is the leading reference work dealing with South African contract law relating specifically to engineering and building contracts. This is the first book to explain the law applicable to the updated Joint Building Contracts Committee (JBCC) Principle Building Agreement (6th edition, 2014) and the Engineering General Conditions of Contract for Construction Works (2nd edition, 2010), which are both annexed to the book and extensively cross-referenced to assist the reader. The book also cross-references the relevant clauses of the FIDIC Contract Agreement (1999). Disputes arising out of building contracts are often referred to arbitration for solution. This work therefore deals with the effect of the Arbitration Act 42 of 1965 and the Association of Arbitrators Standard Procedure Rules, which are also reproduced as annexures in the book.

However, when these experts speak and write Using unfamiliar language it is often because they have to: 'ordinary' language cannot properly or accurately describe the often complex concepts and issues involved.

The Latest developments in the forensic investigation discipline are a result of the fact that forensic investigation is a continually evolving science. This work deals with all the circumstances in which dismissals arise and are challenged – from dismissals for misconduct and incapacity, through retrenchments, automatically unfair dismissals, dismissals of protected and unprotected strikers, to the procedures required before such dismissals can lawfully be effected and challenged. Written in a clear and readable style, the exposition of each principle is illustrated with examples drawn from the case law.
