The Yeti: Sprit of Himalayan Forest Shamans / Larry G. Peters

Delhi : Nirala Publication, 2004

121 p.; 21cm

81-85693-57-9

\$ 9.00

---

[The Book takes a fresh look at the Yeti, the elusive snowman of the Himalayas. Dr. Peters here aspires to establish the Yeti as the sprit of the Himalayan Forest Shamans. In his view, Evolution-minded researchers' hunt for missing-link led to a scientific dead-end and the Yeti who became associated with research fell into disrepute as a superstitious fallacy of the Himalayan natives. In other words claims Dr. Peter the Yeti appeared to be a Superstition wed to spurious theory. Consequently, the Yeti academically became an abominable snowman. Yeti is a living, current popular mythology and a folkloric treasure whose origin the present book seeks to explore. Tracing its history to the Pre-Buddhist, fierce sprit of nature-mountain goddess and forest wild men of Bonposhamanism in history, evaluating the cross-cultural implications of religious practices, myths rituals, legends and scriptures. The Yeti, to sum up, is a sparkling piece of original research written with an objective to rehabilitate interest in the study of Yeti as a spiritual teacher and initiator of shamans.]

[This Study of Credit Relations in Nepal Discerns the Culturally varying potentialities of Credit relations and related forms of cooperation by means of a substantivist research perspective. The analysis concentrates on the Cultural historical development of credit relations and on case studies disclosing differing notions and practices of credit relations among three representatively chosen ethnic communities in Nepal, the Nepalese Hindu castes, the Newars and the Sherpas. By offering a comparative outline, the study also intends to propose a minimal programme for research on culturally embedded credit relations.]

[In recent years, there has been increasing concern about corporate governance issues in the development debate of the country. It is being increasingly believed that there is a vital connection between sound an responsive system of corporate governance and the effective operation of the financial institutions. The World Bank in the year 2000 argued that the central constraint on Nepal's development over the last few decades has not been the paucity of resources, but the lack of effective governance and well functioning institutions which can adequately perform the functions which are essential for a coherent economic development process. Creating a well functioning and efficient Corporate Governance and Financial to Sustainable Development.]

The Other Side of Development

In the present study, Rudolf Hegger relates the archetypal symbolism of Naga and Garuda to the practical realities of development co-operation. He illustrates the decisive role that Naga and Garuda forces are playing in local as well as international development work. Meaningful development will always depend on both: the competitive interaction and the complementary unity of our instinctive commitment (Naga) and our detached reflection (Garuda)]

[In many areas of the world of destruction of natural resources and the rapid growth of population are among the most important problems facing individuals and governments. This book utilizes the tools of social anthropology and population studies in an attempt to see some of the causes and consequences of population growth and some of the effects of change in natural resources. It analyses a particular 'community' in the Annapurna range of the central Himalayas during this

century, and investigates how the destruction of forests and the growth of settled rice cultivation have occurred, and some of the consequences. The Gurungs are famous as recruits to the Gurkha regiments of the British and Indian armies, and the demographic and economic effects of foreign mercenary labour are among the topic examined.

The book is a contribution to the literature on population patterns in small, non-industrial communities and supplements our information on domestic economics. It also contributes to the debate, centred on the work of Malthus and Boserup, on the relation between agricultural system and population growth. The conclusions are extremely gloomy, especially when set within the context of more general theories concerning the relations between population and economy.]

[This book is a historical study of one of the prominent medieval kingdoms in the trans-Himalayan region of Nepal. The core territory of this kingdom is known today as 'Mustang' of North -Western Nepal. This is the first effort of a Nepali Scholar to sketch a full-fledged historical outline of the kingdom by employing both Nepali and Tibetan sources. The book is based on several fieldworks conducted in Mustang and surrounding districts of western Nepal during 1982-84 and 1995. This research work has also utilized extensive published and unpublished archival sources, both in Nepali and Tibetan.]

[In the early years of the 20<sup>th</sup> century when every country, including Japan, was looking to the west for advanced studies and training in modern technology, Nepal looked to the east, Japan, for its learning. For the first time Nepali rulers looked abroad upon an external world that offered promises. Japan's pattern of Development and growth was thought appropriate and Nepal could learn more from Asian experiences. The profound transformation started in the beginning of the nineteenth century made Japan a powerful nation and became the first nation in Asia to have parliament. All these developments of Japan impressed the then rulers and government of Nepal to adopt a policy to send Nepali youths to Japan for studies. In addition to it there were some similarities between the two countries through their cultural and then policy situation, which naturally attracted Nepal. Despite enormous difficulties and situations the gallant effort made by the first group of Nepali students overseas was appreciated. The students were the pioneers in establishing direct people to people friendship between Nepal and Japan. In Order to make the facts known to all the concerned people this book is divided into three sections in Nepali, Japanese and English languages. Photographs, documents and bibliography are also added in the book. This evidence helps to illustrate how the Japanese government and the people extended sincere cooperation to the Nepali students to pursue their studies.]

[These themes are explored by analysing the voluminous literature by military authors who have written and continue to write about the 'Gurkhas', those legendary soldiers from Nepal who have served in Britain's imperial and post – imperial armies for more than two centuries. The author discovers that, instead of exoticising them, the military writers find in their subjects the quintessential virtues of the European Officers themselves : the Gurkhas appear as warriors and gentlemen. However, the author does not rest here : utilising a wealth of literary, historical, ethnographic sources and the results of his own fieldwork, he investigates the wider social and cultural contexts in which the European chroniclers of the Gurkhas have been nurtured. This book will appeal to a wide readership, academic and non-academic, such as students of anthropology, literature, cultural studies, military and colonial history, South Asian studies and readers generally interested in militaria.]

[The tragic death of King Birendra, Queen Aishwarya and Members of the Royal Family in the massacre that took place in the Narayanhiti Royal Palace in Kathmandu Nepal, on June 1, 2001, has left the kingdom and its people devastated. For Nepal, the year 2001 was blood, terror and tears. The enormity of the tragic June 1 incident left a deep scar on the Kingdom's psyche.

This book, neither seeks to prove anything on the sad tragedy, nor does it endeavours to comment on issues related to the tragic incident. The book is primarily dedicated to the life and times of late King Birendra, the symbol of national unity. It merely attempts to recollect the moods and moments of the King's sudden death that left the kingdom facing. During his almost three decades of golden and memorable reign, King Birendra made the institution of Monarchy not only acceptable but respectable.]

[Business and Law in Nepal: Evolving the Legal and Judicial Framework for Corporate Governance provides an excellent, timely overview of the debate in Nepal over pro-business, pro-growth, and pro-people legal reform. All of Nepal's statutes concerning corporate governance and business affairs either have been redrafted or are in the process of revision and extension. Many of these concern financial institutions such as the commercial banks, development banks, and microfinance units.

This volume is the result of a Colloquium that brought together Nepal's leading lawyers, business managers, accounting professionals, and policy makers. The chapters are authored by acknowledged leaders in their fields. The thematic papers and the opinions of the discussants are laced with practical examples that raise issues such as the transparency of state actions, the fairness and predictability of judicial decisions, the weaknesses of government legal services and the judiciary, and the inadequate mechanisms for addressing grievances against the state agents for their actions and inactions.

The book provides a guide to lawmakers, researchers on the legal and judicial sectors in Nepal, and all others interested in the progress of legal, judicial, and private sector reforms.]

[Newari, a Tibeto-Burman language, is the mother tongue of the Newars, the earliest settlers of the Kathmandu Valley of Nepal. The Newars have long occupied a culturally important place among the Himalayan peoples. Over the centuries they have developed a complex and advanced culture which contains elements taken from both the great Sanskrit traditions of India to the South and the traditions of Tibet and China in the North. In Nepal's literary and historiographic traditions, Newari has a prominent place, since it is the oldest written language of Nepal, and for several centuries, from the end of the 14th century, was the principal Nepalese language to be used in court records, inscriptions and historical documents. Partially because of the cultural importance of the Newars, and partially because Newari is one of the oldest written Tibeto-Burman languages Newari has been accepted by scholars as a key Himalayan language, and they have long called for reliable reference works on the language. The lexicographic studies of Classical Newari that have so far appeared have been inadequate. The most important, Hans Jorgensen's A Dictionary of the Classical Newari, was published more than sixty years ago. This 6000-word Dictionary was based on the limited source materials available to the author, who never traveled to Nepal. Subsequent studies have been limited to glossaries attached to translations and editions of classical Newari works. In the field of linguistics, Newari has long been considered a particularly important language. It is one of four Tibeto-Burman languages with an old tradition and the one day member of the Himalayan

group with such a tradition. Classical Newari is thus obviously important in the study of the Development of the Tibeto-Burman languages in general and the Himalayan languages in particular. A comprehensive dictionary would be an invaluable research tool in such study.]

76 p.; 22cm  
\$ 2.00

[Essays on Nepali, Indian and American literature is a collection of articles published in literary journals and English newspapers, mostly in the Kathmandu Post, The Rising Nepal and The Space Time. The book reflects the creative achievement of major Nepali writers, especially Laxmi Prasad Devkota and B.P. Koirala. It sheds light on progressive movement in Indian writing in English, with special reference to Mulk Raj Anand's works. The book throws light on the fundamental features of American philosophy and Multiculturalism. For readers interested in Nepali writing in English, the book provides a fair measure of works as a whole in a single volume spread over a quarter of a century. For readers concerned with Indian writing in English and American Literature, the book gives an additional intellectual food. It is hoped the book will be useful for post-graduate students who need to know more about Nepali, Indian and American Literature written in different contexts and circumstances.]

[This is a preliminary essay on the literature written in the older dialects of the Newari language available mostly in the manuscripts dated between ca.A.D. 1360 – 1900. Being a programmatic rather than a final statement on the nature of the literature, part of its purpose is to erect a framework of firm chronology without which no history can be attempted.

The essay is divided into two parts : the first part, consisting of the first six chapters, presents a brief survey of the literate culture and traditions of the Newars, of which Newari literature is only a tangible evidence. The second part deals with the literature proper.]

[Maoists is first comprehensive and candid account of the Maoist insurgency that has been rocking the Himalayan kingdom for nearly a decade now. Authentic and up-to-date, the book discusses how Nepal popularly known as the Birthplace of Buddha, the Emperor of world peace, has recently got a new name – a nation of Maoist insurgents who want to abolish Monarchy and turn Nepal into a 'Peoples Republic' The Maoists control a large part of the country, especially in the Western hills and more than 7,000 people were reported to be killed by the end of 2002.

The continuation of the Insurgency causes a grave setback to the Democratic set-up in Nepal that has flourished since 1990 Popular Movement that resulted in the people of Nepal being sovereign. As numerous Dialogues and Cease-fires continue to fail time and again, the disturbing question book grapples is – Will Maoists ever give up their arms or will Nepal turn into another Cambodia, Peru or Afghanistan? ]

[A Kingdom under siege: Nepal's Maoist Insurgency, 1996 – 2003 is an authoritative and comprehensive overview of Nepal's Maoist insurgency. It describes how the state's neglect of many of its people combined with political instability and the growth of radical left politics in the Maoist heartlands of mid-western Nepal led to a build up of the tensions that were unleashed in February 1996. The insurgency quickly grew and gained favour with many of Nepal's poor and disadvantaged people as the rebels held out the promise of a more just and equitable society.]

[As is evident from the title of the book, the author's research agenda is exploration and explication of bon and related religions. He has made extensive survey of the literature and also some observations in the field. The core enquiry has been on the relationship Between Bon and Buddhism along with tracing some link between Bon and Shamanism. The author describes historical developments and theoretical aspects of Bon and also illustrates some rituals from personal observation. The book has much relevance as the ethnic people in today's democratic Nepal are asserting their cultural identity. They will discover many aspects of their heritage in the material compiled here.]

[Avalokitesvara is the most popular Bodhisattva figure in the Mahayana Buddhism for his universal love and compassion. He renounces his own personal salvation and dedicates his whole life for liberation of all living and suffering beings of the world. The book deals his charismatic ideals, versatile characters and multifaceted forms as a saviour of the world. His popularity covers the vast lands of the Asian continent from the Himalayan Regions to the East Asian countries following the Mahayana Buddhism. The book also describes the symbolic meaning and meritorious virtues of the mantra of Avalokitesvara – 'Om Mani Padme Hum' signifying innate "Buddha – nature is within" all us. Ranjana Bajracharya treats concisely the whole spectrum of the Bodhisattva concepts and its powerful visions of deeper universal consciousness

and compassion for liberation and freedom of all the suffering humanity in the world. The book will have wide appeal to all readers from the east and the west who are interested in the Buddhism.]

The essays compiled in this book combine the subtle cultural and socio-political modes of the Nepali Society. The most remarkable aspect of her writing is her academic approach, if not the tedious rigour of academic augmentation, to the topics that are often either ignored or bandied about by writers on the subjects. She chooses topics from diverse areas – from a simple road sign to the existential question of being a woman academic and participant in the socio-political drama of the society.

[This comprehensive study explores the social Construction of gender among high-caste (Brahman-Chetri) Hindus in rural Nepal. The unit of study is the family as it operates within kinship networks. Through a detailed examination of the social, mythic and ritual structures which shape the interaction between men and women, the study reveals the symbolic roots of women's power and the complex social institutions, norms and beliefs which seek to contain that power and direct it to the perpetuation of the patrilineal group. The study shows how individual women live and strategize within the ambiguities of their position in the gender system. While the most "Visible" aspects of this system focus on women's ritual impurity. The richness of Dangerous Wives Sacred Sisters lies in the range of methodologies used and the intimacy the author established during her ten year contact with the families and with the community in which she lived as participant observer. Genealogies, surveys of marriage patterns, rituals, and religious beliefs are also utilized to elucidate both the broader and finer details of the status and concerns of women. Especially valuable are the in-depth life history interviews conducted with a degree of privacy rare in the village context.]

[State – Women Relations in Nepal have changed at three major historical junctures. A high degree of mobility is a sine qua non for participation in politics, whether the socio-cultural milieu of the country allows Nepali women to be mobile is thus a vital issue of concern. Are women in a position to seize the opportunities granted by the liberal political atmosphere to interact with the state as citizens? Women-specific civil organizations provide an alternative political space where collective action by women allows negotiations with the state. The experiences of Scandinavian countries ... Suggest that the most important strategy for women's empowerment in intervention in political parties. Re-Imagining the state from the feminist perspective is to reorient an activist and intervenist state, making it as women friendly as possible through strategic interventions.]
