Do's and Don'ts in Thailand / Kenny Yee & Catherine Gordon  
3<sup>rd</sup> Revised Edition  
Bangkok : Booknet Co. Ltd, c2006  
164 p. : ill. ; 21 cm.

\$ 14.00

[Among other Southeast Asians, Thais stand out for their thinking and their body language. If you stay here long enough, it can happen to you, become an honorary Thai that is. You gradually find yourself speaking pidgin English. In the provinces you join the voluntary work gangs cleaning the toilets and weeding the flowerbeds at the local high school. In fact, you become a better person!

To ensure that you, the foreign resident, fleeting visitor or armchair traveler, enjoy your stay in Thailand, we present a light hearted but practical guide to the do's & don'ts of this very special country. Don't be surprised if that pretty salesgirl on the perfume counter is a man. There's a place for everyone in Thai Society. Do believe your eyes: yes, that roadside stall is selling deep fried grasshoppers and caterpillars. And yes, Do listen very hard to the whispering that passes for conversation: Thais do not raise their voices, so why should you?

Do be assured that as a foreigner you can get away many things, but Don't lose your temper. Want to know what you can and cannot talk about with Thais? Then Do buy this book! ]

Contextualized Thai Proverbs with Literal Translations in "Rhyming" English / Wirroon Chayarak

1. Proverbs, Thai  
\$ 10.00

[Contextualized Thai Proverbs presents a rich collection of one hundred Thai proverbs in English translation. Presented to the reader, both Thai and Western, in a wholly novel manner, the English version of these Thai proverbs embodies and reflects an essential aspect of the Thai language's cultural identity, namely "rhyming"- literally ... in Thai. Additionally, this book is amply illustrated with one hundred lovely drawings to accompany each of the proverbs so as to ensure a full

understanding of their literal meanings. Significantly, all of the proverbs are put in context, or, more precisely, in the contemporary Thai Societal context of genuine social and political events, with the aim of making their figurative meanings sufficiently explicit and easily comprehensible. Put simply, all the proverbs in English translation are contextualized. This is the immediate origin of the title of this book, "Contextualized Thai Proverbs".]

[Khon Muang Music and Dance Traditions of North Thailand by Andrew Shahriari describes in detail the traditional music and dance of northern Thailand-the area of the former Lanna kingdom and its legacy. The author has researched and performed the various musical instruments individually and in ensembles in Thailand and the United States. This book is invaluable for serious students of Thai music, as well as to the many visitors from abroad who visit Chiang Mai and its environs every year, enabling them to understand and appreciate better the various traditional dances and music encountered during their stay. Numerous photographs accompany informative text that covers eight of the most common dances, more than fourteen khon muang instruments, and the eight primary ensemble traditions of the region. National, regional, and local events, such as Spirit Dances, are also highlighted to reveal the wealth of vibrant musical activity found throughout the region.]

[Encyclopaedia of Thai Massage is a comprehensive and invaluable resource on Thai massage therapy. The book is based on the author's experience of teaching massage in Thailand's most prestigious massage school and draws heavily on his research in traditional Thai medicine, as well as his practice of hatha yoga.

Bridging the gap between theory and practice, this manual provides an introduction to the history, ethics, and spiritual underpinnings of traditional Thai massage, while being based on a modern understanding of anatomy, and physiology. It presents the basic massage principles and techniques, followed by a fully illustrated, comprehensive, step-by-step guide to the classic Thai massage routine, noting the frequent parallels with yoga postures. Sample therapeutic routines to treat specific disorders are also described in detail. The book includes an in-depth explanation of Thai energy meridians and an atlas of acupressure points.

Written in an engaging and informal style, this guide will be extremely useful to those with no prior exposure to massage techniques, and at the same time, will satisfy the most advanced practitioners of Thai massage therapy.]

String Figures : A Study of Cat's Cradle in Many Lands / Caroline Furness Jayne

[String Figures, A study of Cat's Cradle in many Lands is a reprint of an exhaustive study. This cultural heritage can be found in many different cultures across Asia, America and Europe. There seem to be two main groups. In the European and Asiatic type two strings pass around the back of each hand and crossing loops are taken up by the middle finger. In the oceanic and American type there are no strings at the back of the hand and the crossing loops are taken up by the index fingers. The first type requires two players while one person suffices for the usual figures of the second type.

Examples of the Asiatic type can be found in Korea, Japan, East Indian Archipelago, Philippines and other places. In Europe this type is found in Denmark, Germany, Austria, Switzerland, France, Netherlands, England.

The Oceanic type was found in Australia, New Guinea, Melanesia, Polynesia and various parts of America, from Alaska to all parts of native American Indian Societies.

Two facts seem to be significant: 1. the widely spread accompaniment of words or chants and 2. the frequent representation of persons, incidents or objects connected with religion or mythology. One could speculate that the string figures are remnants of a lost art of communication of ancient peoples. Detailed drawings illustrate the text.]

[This collection of eleven essays by senior Asianist Craig Reynolds features debates about meaning in Southeast Asian and Thai history. He explores themes that have hitherto been treated superficially in Thai historical writing, including Siam's semi-colonialism in the late nineteenth century, the concepts of militarism and masculinity, collective memory and dynastic succession, the relationship of manual knowledge to ethnohistory, and the dialectics of globalization. Other more familiar topics under Reynolds's microscope, treated with new material and approaches, include cultural nationalism and religious history.]

[High in the mist-shrouded mountains of northern Laos, cut through by the Mekong river, is Luang Prabang, a remote town of glittering Buddhist temples and barefoot monks. The natural setting of the town, on a promontory by the river, encircled by an amphitheatre of steep, verdant mountains enhances its jewel-like identity.

Luang Prabang is a treasure trove of sacred art dating from the 17<sup>th</sup> century. There are 33 Buddhist temples, carved from wood, exquisitely frescoed and gilded, with layered roofs sweeping to the ground. Interiors are adorned with Buddha images of serene grace and dignity. With the arrival of the French colonizers in the 19<sup>th</sup> century came a secular architectural tradition. In Luang Prabang, the fusion of these two disparate cultures resulted in a singular beauty.

Now a UNESCO World Heritage Site, Luang Prabang is considered the best preserved town in South east Asia.]

Bangkok : Charlie Herald, c2006  
297 p. ; 19 cm.  
974-93957-8-6  
\$ 15.50

[Walking up with a mind distilled from an evening's over indulgence, this Irish-born Los Angeles resident, discovered he unintentionally booked a flight on the internet to rendezvous with his father in Bangkok. So begins a whimsical, self-unearthing and true family tale, set against a backdrop of three cities of Angels: Los Angeles, Bangkok and Ballycastle, Ireland.

Chronicled from both a resident's and cultural rubbernecker's perspective, the narrator recounts: calling the Vice President of the United States a wanker, in person; assaulting a Hollywood leading man; a near-death experience with an LA street gang; riverdancing with Malaysian villagers; father's life-altering participation in the Bali bombing; spending the night with an IRA terrorist; prostitution; transsexual experiences and numerous comedic, cultural contradictions.

The book is written in 'real time', allowing the reader a passenger's insight, which educates about three cultures, entertains, inspires and hopefully connects with their own experiences

Honesty is revealing and reality is often stranger and funnier than fabrication.]

[A renowned American novelist once wrote that one 'can never go home again', but as the author demonstrates in this delightful and subtle account, such is not the case – with a little courage, we can and should cherish our past and, from time to time, we must reaffirm our roots. O'Hara's journey, as he gives us glimpses into a youth that was punctuated by hardship and loss, is more personal history than travel account and reveals a character determined to succeed, even at the expense of abandoning his country of birth. In parallel it is an outline of the history of that country, Burma, and provides fascinating insight into some of the causes of that nation's failure to realize its great potential.]

[Recent development in medicine and the life sciences have led to considerable moral perplexity about the rights and duties of health professionals and researchers, patients and research subjects. Since 1970 members of a number of academic disciplines including biology, medicine, philosophy and religious studies have been involved in an on-going discussion of the complex ethical issues raised by these developments.

The book is written with the Thai and other Asian students in mind. It is an introduction to Bioethics both in general and Thai Buddhist Contexts. The first section is a review of the on-going bioethical discussion in the west focusing on some of the ethical approaches and position taken by the ethicists there. It is also intended as an illustration of the way in which systematic ethical inquiry is conducted in regard to the moral dilemmas found, and the way rational strategies can be used to resolve them. The second section is an attempt to clarify important Buddhist ethical principles and to apply them in dealing with some of the bioethical issues coming to the fore in our time, such as the issues of euthanasia, human cloning and stem cells research. Though written out of the Thai Buddhist context, it is also applicable to the Buddhist setting elsewhere.]

[Bangkok's Foodscape: Public Eating, Gender Relations and Urban Change Provides an overview and analysis of the habit of "public eating" in Thai society with specific attention paid to the case study of Bangkok where the phenomenon has been particularly widespread for several decades. Using the well-established ethnographic approach of "thick description", this contribution to the study of Thai and Southeast Asian foodways concentrates on the nexus between eating habits, the social construction of gender and patterns of urban development in one of the World's mega-cities. By providing a detailed snapshot of the rapid growth period of the early to mid -1990s in central Bangkok and concluding with insights as to the impacts of the economic crisis that wreaked havoc in the latter part of the decade, Gisele Yasmeen illustrates the recursive social, economic and cultural impact of the "foodscape" on urban space.]

[In the present social and cultural transformation of South Thailand's cultural politics, ideologies involving the family, gender and home provide the cultural codes in social dramas of the state, the media, and social and religious movements. This study looks at micropolitics and the nesting of the political action of everyday life in larger, ultimately global structures of power. Exploring the making of class, culture and space, the production and consumption of culture is understood as work which involves the constant negotiation of boundaries.]
