This book provides insights into the nature of sex in the villages of Thailand. Dr. Patchanee Malikhao, its author and a Thai sociologist, spend time in villages to obtain first-hand knowledge of strategies that may help prevent the spread of HIV/AIDS through sexual relations. The book also probes whether social determinants, including culture and religion, help or hinder local residents in their own attempts to curb the spread of AIDS. The cost of managing the disease has increased significantly compared to many other health interventions. To make sure such expenditures are effective, we need to understand the social context of prevention strategies and confirm that it is relevant to the social relations of people. This book will help us achieve this understanding.

The Thai language has extraordinary rich, varied, and multi-leveled vocabularies for sexual anatomy, sexual behaviors, sexual identities, and attitudes to sexuality. The authors of this in-depth study of twenty one keywords deal directly and unflinchingly with the language of sex in Thailand in all its raw, sometimes humorous, and often derogatory immediately. The

registers of spoken Thai (phasa phut), the language of the marketplace (phasa talat), as well as official discourse (phasa ratchakan), literary usages (phasa khian), and technical and academic vocabularies (phasa wichakan) are all covered.

“Hang Chuon Naron's Cambodian Economy: Charting the Course of a Brighter Future is a tour de force of modern Cambodia's development challenges. The book is without peer in terms of providing a comprehensive and thorough review of Cambodia's economy, from key economic sectors to social development to governance. On a country that still seems 'exotic' and sometimes difficult to penetrate, Dr Naron's survey provides valuable empirical analysis, insightful explanations, and practical recommendations for the way forward. The book ought to be required reading for every student, academic, or practitioner working on Cambodia.”

This biography of the Ninth Panchen Lama, the second highest spiritual authority in Tibetan Buddhism, offers new insights into the tumultuous history of the relations between China and Tibet at the start of the twentieth century. It demonstrates how the Panchen Lama's flight from his monastery on the night of December 22, 1923, remains an essential characterizing event of Tibet's modern history. In China, the Panchen Lama became entwined will not only the Republican government, but also the world of international politics. By the 1930s, the prelate was to find himself a pawn in a diplomatic game played by China, Lhasa, and England for control of Tibet. His flight from his country set the stage for Chinese Republican, and later Communist, control over the selection of his successors, with the repercussions even today for Sino-Tibetan relations.

After a two-month stand-off between Red Shirt protestors and the government of Prime Minister Abhisit Vejjajiva, violence and arson scarred central Bangkok in mid-May 2010. This shocking turn of events underlined how poorly understood the deep divisions in the society and politics of Thailand remained, even five years into the countrys prolonged crisis. This volume collects analysis and commentary on those divisions from an unusually large and prominent group of Thai and foreign scholars and observers of the country. Contributions examine socio-economic, political, diplomatic, historical, cultural, and ideological issues with rare frankness, clarity, and lack of jargon.
