---

The search for knowledge has been the driving force behind mankind's existence since the dawn of civilization, and different cultures have developed their own theories of knowledge. *Searching for the Way: Theory of Knowledge in Premodern and Modern China* deals with the analyses and interpretations of modern Chinese philosophical discourses, especially those concerning theories of knowledge. The author looks at how contemporary Chinese philosophy is awakening from a long slumber and substantiates the hypothesis that this new awakening is fully prepared for fruitful confrontations with the new challenges presented by a globalized world.
