Series on Contemporary China – Vol. 24

\$ 96.00

<http://www.marymartin.com/web?pid=123923>

This book provides a fascinating perspective of the experiences of China's reform in the past three decades by focusing on China's interaction with and learning from the external world in her unprecedented efforts to reform and open up. After three introductory chapters on broad scope of reform in the political, economic, and social realms, this book deals with lessons from the Eastern Bloc, China's reform in East Asian context, and China and the developed world. The book concludes with two chapters looking to the future of China's political and economic development. In the existing literature of China's reform experience, this book is unique in perspective, topic selection, and in-depth analyses. With contributions from a group of prominent scholars in the field of China studies such as John Wong, Zheng Yongnian, Thomas P Bernstein, Dorothy J Solinger, and Bo Zhiyue, it will be of immense value to anyone who is interested in China.

Interpreting China's Economy / Gregory C Chow

ISBN-13: 9789814293303 (HB)

Series on Economic Development and Growth Vol. 5

\$ 88.00

<http://www.marymartin.com/web?pid=122549>

Rapid growth in the Chinese economy over the past three decades poses puzzles and challenges to neo-classical economic theory, as policies implemented during the reform process were often unorthodox. Although the Chinese experience has been widely studied, myths and questions about these reforms remain. To fill in the knowledge gap, and to inform a process of learning from China's development successes, this book features a series of case studies on the policy process of different initiatives, including rural industrialization, dual-track price reform, migration policy, village elections and fiscal reform.

[The book discusses the ways in which the world bank has used undue leverage to impact key sectors of India's economy and shows that the Bank's policies of extreme marketisation, trade liberalization and reduced public spending have created a shocking trend of jobless growth and increased poverty for the majority of people in India. It also covers the negative impacts of the world bank on local democratic processes and their negative ramifications on the environment.]
