\$ 75.00

The Flora of Peninsular Malaysia Series II provides revisions for seed plant families that
occur in Peninsular Malaysia. Volume 1 includes general chapters on the seed plant
families and vegetation types in Peninsular Malaysia. Species assessment and
conservation of seed plants are discussed. Revisions for 26 families, 35 genera and 81
species are provided that include descriptions and keys for the genera and species with
conservation status and distribution maps provided for species. Representative species
are illustrated by botanical plates and colour photographs.
