This book provides a comprehensive overview on Chinese economy in the last three decades and an insightful view on the future reform in China. The China's miracle is used to describe its rapid economic growth in the last thirty years. The author aims to demystify the miracle by analyzing the past and present of economic transitions and showcases the blueprint for future economic reforms, from the perspectives of institutional transformation, urbanization and changes in the labor markets. The book contains hottest topics on Chinese economy, such as land market reform, new-type urbanization and financial reform. It investigates both the long-run growth and short-run fluctuations. The factor markets, including labor market, capital market and land market, are analyzed as key determinants to long-run growth and consumption, while investment and net export are investigated as elements to short-run fluctuations.

1. Malaysia – Economic conditions
2. Malaysia – Economic policy
3. Malaysia – Social conditions
4. Malaysia – Social policy
5. Malaysia – Politics and government

Since 1957, Malaysia's economic development has been an account of growth, transformation, and of structural change. More than 75 per cent of its gross domestic product (GDP) comes from the manufacturing and services sectors. However, Malaysia is stuck in a middle-income trap and is facing challenges on the economic and political front. In June 2010, Prime Minister Najib Razak unveiled the 10th Malaysian Plan (2011-15) to chart the development of Malaysia from a middle- to high-income nation. This publication represents a policy-oriented stocktake and evaluation by academics, policy-makers, and business people on Malaysia's achievements, present work-in-progress endeavours, and some of the future challenges facing the nation in its pursuit to achieve a developed high-income country status
