The book offers an unflinching focus on an important subject dealing with foreign policies of major powers. The authors have put together information which is not readily available in one volume elsewhere and offered their own analysis. The book makes useful reading especially for scholars and practitioners of international relations and diplomacy. Congratulations to the authors and the editor of the book for this valuable edition.

9789745341081

\$ 20.00 / PB

370 gm.

ASEAN Looks West: ASEAN and the Gulf Region is the first major study analyzing the relationship between ASEAN and the Gulf region. A newly formed international team of eleven scholars and experts from seven different countries under the umbrella of the Thai-registered nonprofit organization Human Development Forum Foundation provides some interesting insights in security and economic developments on both sides of the newly introduced Southern Asian Maritime Corridor (SAMCO) stretching from Qatar to the Philippines. This concept is presented to the international academic community as well as policy makers to shed some light on this new corridor, and fill the knowledge gap in ASEAN about the Gulf region and vice versa. What are the major challenges and opportunities for the ASEAN Community and the Gulf region? The scholar team answers these questions by extensively analyzing the strategic framework from an ASEAN perspective, highlighting the three-pillar strategy of the ASEAN Community, and then addressing two major security issues: the maritime component and religious fanaticism. The last chapter copes with energy security and economic opportunities, covering pipeline and nuclear issues as well as some possibilities for cooperation between specific countries. The result of this endeavor by scholars (Iran, Iraq, India, Indonesia, Germany, Pakistan, and Afghanistan) is an essential book for anyone examining security and maritime issues in the Southern Asian Maritime Corridor (SAMCO) as well as for the interested layperson.

The first study of CPI's role in supporting the Indira Gandhi government during the Indian Emergency of 1975.

India, June 1975. Fundamental rights are suspended. The Opposition is in jail. The Press is shut down. And Prime Minister Indira Gandhi has just declared Emergency. Only one political party supports Indira Gandhi's action—the Communist Party of India (CPI).

Why did the CPI take up this lonely and much-criticised stand? Were there any pressures from the Soviet Union or was the CPI looking for some political mileage? CPI's stance on the issue has never been discussed, analysed and understood. In an exhaustive study of the period, David Lockwood lays bare the facts before us. Through personal interviews with CPI members, internal documents of the party and archives, he presents the most thorough study of the CPI and the Emergency so far.

An in-depth analysis of how India, China and other South Asian countries can cooperate on key challenges affecting their bilateral relationships

This book focuses on identifying the extant barriers and impending opportunities for effective coordination of transport infrastructure and enhancement of trade activities along the border regions of South Asian countries. It asserts that with pertinent policy guidelines and timely initiatives from the participating countries, unprecedented opportunities can be capitalized upon for consolidated economic growth of the region. It exposes how untapped resources, bureaucratic and political inertia and a lack of collective endeavour remain major impediments to bilateral and multilateral cooperation which, if surmounted, could pave the way for successful regional initiatives.

It will be indispensable to researchers and scholars of international relations, South Asia studies, international trade, comparative politics, political economy, and to the informed general reader.

A comprehensive analysis on the rise, assertion and dominance of the New Hindu Right forces in civil society

From its forgettable electoral performance of 1984 to its historical victory in 2014, the Bharatiya Janata Party's (BJP) story has been fodder for many political and academic debates. In this book, the authors show how the Hindu Right uses security, both external and internal, as a strategy for political mobilisation and eventual electoral success. It further explains the organisational and ideological penetration of the Sangh Parivar into the civil domain through strategies of securitisation. Deriving data from original sources, writings of leaders and their autobiographies, speeches, government documents, reports, pamphlets and manifestos of various Hindutva organisations, the work follows the growth of the Hindu Right forces and its trajectory over the years, taking a close look into its philosophical settings and political strategies.

The book assumes significance in light of the massive electoral success of BJP in the 2014 elections.
