LexisNexis, Hong Kong 2016

9789888359790

\$ 260.00 / HB

Private M&A in Hong Kong details the sale and purchase of shares, one of the most common forms of corporate acquisition in the territory. By acquiring part or all of the share capital of a target company, the investor can exercise control over the target company as well as its businesses and assets. Many parties tend to opt for sale of shares over sale of assets because they are simpler and more straightforward. However, as the subject of the transaction involves shares in the target company, parties should carefully consider certain common legal issues when structuring a share acquisition. Private M&A in Hong Kong includes practical examples and explanatory notes to exemplify the procedures and issues in private M&A investments, and illustrates the key considerations involved in such transactions. This book will be a good resource for anyone seeking to understand the main issues, common procedures and documentation involved in private M&A transactions in a common law jurisdiction.

The Indian Constitution posits a separation between a secular domain that the state can regulate and a religious one in which it should not interfere. However, defining the separation between the two has proved contentious: the state is involved in various ways in the direct administration of many religious institutions; and courts are regularly asked to decide on rights linked to religious functions and bodies. Such decisions contribute to (re)defining religious categories and practices.

This volume explores how apparently technical legalistic action taking place in courts of law significantly shapes the place Hinduism occupies in Indian and Nepalese societies, perhaps even more so than the ideology of any political party. The approach developed in this volume is resolutely historical and anthropological. It considers law as part of social, religious, and political dynamics.
