Mining Africa : Law, Environment, Society and Politics in Historical and Multidisciplinary Perspectives / Artwell Nhemachena & Taopiwa V Warikandwa (Eds)

This book is a pacesetter in matters of mining and the environment in Africa from multidisciplinary and spatio-temporal perspectives. The book approaches mining from the perspectives of law, politics, archaeology, anthropology, African studies, geography, human ecology, sociology, history, economics and development. It interrogates mining and environment from the perspectives of customary law as well as from the perspectives of Euro-modern laws. In this sense, the book straddles precolonial, colonial and postcolonial mining and environmental perspectives. In all this, it maintains a Pan-Africanist perspective that also speaks to contemporary debates on African Renaissance and to the unity of Africa. From scrutinising the lived realities of African miners who are often insensitively and unjustly addressed as "illegal" miners, the book also interrogates transnational mining corporations; matters of corporate social responsibility as well as matters of tax evasions by transnational corporations whose commitment to accountability to African governments is questioned.
