The Karoo rocks have preserved fossil remains for millions of years. This palaeontological treasure trove tells us more about the first mammals, early dinosaurs, and the ancestors of living reptiles such as crocodiles that roamed our country ages ago. New discoveries explain the impact that climate and environmental changes had on these primitive animals, and recent geological research reveals why fossils much like those of the Karoo have been found in India, China and even Antarctica.

Essential oil is a highly valued product used by a wider and wider scope of people whether they aware of it or not. Essential oils can be used as a mixture for various products such as beauty, health, and wellbeing. In Indonesia, the number of essential oils producer and seller have been increasing as more people see the benefit of essential oils they can obtain. However, this phenomenon must be addressed carefully by the essential oil producers in Indonesia as the challenge can be more advanced such as the limited supply and the low quality of essential oils.
