Love For Living Animals: Stories of Animals That Are In Critical Danger Of  
Extinction: Essays / Mona Sabalones Gonzales (Photographer) Elizabeth Barrett  
Central Book Supply, Inc., Philippines 2023  
v, 231p.  
9786210220414  
\$ 50.00 / null  
400 gm.

This collection of essays, each one painting a picture of an endangered animal,  
helps us to know more and get acquainted with animals that inhabit our world.  
They hope to rekindle care and concern, to remind us of what each animal can do  
to make our world a wonderful place to live in.

Wild City: A Photographic Guide to Amphibians, Mammals, and Reptiles of Metro  
Manila / Jelaine Can, Trinket Constatino, Abby Favis  
The University Of The Philippines Press, Philippines 2023  
viii, 104p.  
9786210900187  
\$ 25.00 / null  
250 gm.

Metropolitan Manila is a large, bustling city, characterized by industrial, commercial, and residential infrastructure. Like other urban dwellers, humans of Metro Manila live side by side with animals that are often unnoticed and underappreciated. Forty-five of these species, including seven amphibians, twenty-two reptiles, and sixteen mammals, are introduced in this book. This field guide features general information on the life history and ecology of each animal group, including diagrams illustrating relevant features to look out for. A beautiful full-color photograph of each species is provided, as well as the scientific and common names, and information on descriptive physical characteristics, habitats and habits, and conservation status. The book also gives an overview of urban biodiversity, its role in contributing to the health of the city and the factors that threaten its existence. Tips for wildlife observation and creating wildlife-friendly spaces are also provided. *Wild City: A Photographic Guide to Amphibians, Mammals, and Reptiles of Metro Manila* is the first of its kind in the Philippines. It is an invitation for city dwellers to experience, explore, appreciate, and hopefully conserve the nature around them.

A Handbook of Environmental Geography / Fardeen Emir

Peridot Literary Books, Delhi 2023

284p.; 24 cm.

Bibliography Includes Index.

9789390393978

\$ 47.50 / HB

650 gm.

Geography and environment are the study of the human-dwelling world along with the humans living on the Earth in several places; their environment and the various landscapes surrounding them. Environmental Geography is the discipline which goes on to explain the effects of humans on their environment as well as the impact of the environment on humans. Basically, one can study the interrelationship & interdependence between the living beings and their surrounding environment. Environmental Geography is a mixture of both the disciplines, that is, Physical and Human Geography. It is good to use the resources coming from the environment but over-exploitation of anything leads to doom. Being the protective layer in the Stratosphere, the Ozone layer protects the living beings on Earth from the harmful UV (Ultraviolet) rays of the Sun.

River, Society and Culture: Environmental Perspectives On The Rivers of Assam and Bengal / Rup Kumar Barman

Primus Books, Delhi 2023

xvii, 98p.; 22 cm.

Bibliography Includes Index.

9789356878358

\$ 9.50 / null

250 gm.

South Asia's river systems are known for their multiple topographies and varied geography. There are several transnational rivers that flow to eastern and north-eastern India through Bhutan, Nepal and China. Geological and environmental changes; the construction of dams, barrages and hydroelectric power projects as well as their side effects; and massive floods, soil erosion and a rise in silt beds have changed the traditional relationship between these rivers and the civilizations settled near their banks. *River, Society and Culture* presents these dynamics in the context of the rivers of Bengal (both West Bengal and Bangladesh) and Assam.

The Nigerian Environment Past 100 Years and the Future / David Okali, Mynepalli Sridhar & Chris Ikporukpo

The Nigerian Environmental Study Action Team (NEST), Nigeria 2019

xvi, 472p.  
9789789810574  
\$ 100.00 / null  
1200 gm.

"The Nigerian Environment: Past 100 Years and the Future" is a commemorative publication that emerged as part of the country's Centenary celebrations in 2014. This comprehensive work was assembled following a symposium organized by the Nigerian Environmental Study Action Team (NEST), generously supported by the Federal Ministry of Environment. The book covers a wide array of topics, encapsulating the entirety of the environment, and is thoughtfully organized into 12 distinct thematic areas. These areas include land resources, water resources, the atmosphere, ecosystems, forests, and biodiversity, coastal and marine environments, energy and environment, environment and health, urbanization, industry, and waste management, environmental education and awareness raising, disasters and emergencies, as well as environmental governance, economics, and the management of Nigeria's environment. Within each of these thematic areas, the publication delves into a comprehensive analysis of the trends in managing the Nigerian environment over the initial hundred years of the country's existence. It then extends its purview into the future, projecting sustainable strategies and practices. This publication holds a place of great significance as a national reference work on environmental matters and sustainable development. It serves as a beacon for policymakers, scholars, and concerned citizens, offering invaluable insights and guidance to shape a more sustainable and environmentally responsible future for Nigeria.

Kimberley bush food : edible plants of the Kimberley region of Western Australia / King, Madison & Horsfall, John  
University of Western Australia Publishing 2023  
xii, 636 pages : colour illustrations, map, portraits ; 23 cm  
9781760802202  
\$ 59.99 / null  
920 gm.

In an effort to preserve the traditional knowledge of bush food, authors Madison King and nurse educator, John Horsfall, have documented over 350 species of plants and fungi that were regularly gathered by the Indigenous peoples of the Kimberley region before and after colonisation.

Kimberley Bush Food is a valuable resource for both Aboriginal and non-Aboriginal people interested in traditional bush food and alternative medicine. With comprehensive information on over 350 species, including images of each plant, this book is a practical guide to preserving traditional knowledge and using the plants and fungi of the Kimberley region for a healthier, more sustainable future.

Written by experts in the field, this book describes each species of plant and fungi, its nutritional benefits, and how it was used by the Indigenous people of the Kimberley region. It also includes detailed information on where to find these plants and fungi and how to prepare them for consumption.

With land clearing for crops and farming of sheep and cattle contributing to the extinction of many of these species, this guide offers a timely and important insight into traditional knowledge that has been passed down for thousands of years. This book is an essential read for anyone interested in Aboriginal culture, bush food, and preserving the knowledge of the past for future generations.

Blue Duck Station: The land, the rivers and the people / Nicola McCloy

David Bateman Ltd, New Zealand 2023

256p. ; 29cm.

9781776890453

\$ 95.00 / HB

1700 gm.

Journey into the heart of wild New Zealand with Blue Duck Station, a captivating portrait of one of the country's most environmentally significant stations. Nestled alongside the idyllic Whanganui National Park, where the Whanganui and Retaruke rivers converge, this remarkable station combines traditional farming practices with tourism, conservation and new ways of doing things. The land's rich past and the resilient and determined people who shaped it have paved the way for current owner Dan Steele and his family to make their mark. Dan, a passionate advocate for native wildlife, now welcomes people from around the world to experience a place where adventure and environmental initiatives go hand in hand. Join author Nicola McCloy as she introduces us to the people, the places and the history that make Blue Duck Station such an extraordinary part of New Zealand.

The Forgotten Forest: In Search of The Lost Plants and Fungi Of Aotearoa / Robert Vennell

HarperCollins Publishers, New Zealand 2023

576p. ; 22cm.

9781775542193

\$ 40.00 / null

500 gm.

Deep in the forest, in places you would never think to look, are some of the most remarkable creatures. Overlooked and unsung, this is the forgotten forest: a world of glow-in-the-dark mushrooms and giant mosses, where slime moulds travel the forest in search of prey and ancient lichens live for thousands of years. Join bestselling author Robert Vennell on a walk through this fantastical forest, wandering through tales from history, science, and spirituality in search of these weird and wonderful species. Filled with beautiful historical artworks and illustrations, The Forgotten Forest is a celebration of the little things that pass us by and will forever transform a simple walk in the bush.

In Pursuit of Champions: The Inspiring Story of the Pukorokoro Miranda Shorebird Centre / Keith Woodley

Sherlock & Co. Publishing, New Zealand 2022

336p. ; 24cm.

Include Index.

9780473640774

\$ 40.00 / null

1000 gm.

'For nearly three decades, I have lived beside an estuary. Gleaming shell banks beneath vaulting sky, the clockwork pulse of tides and seasons, and vast muddy flats stocked with birds - these represent home. It is an attachment I cherish, a sense of place and fascination, continually renewed. But it was not always so. Like many New Zealanders, I was once quite unaware of the value of such places.' So begins *In Pursuit of Champions*, the captivating story of Pukorokoro Miranda Shorebird Centre. For nearly 50 years, the Pukorokoro Miranda Naturalists' Trust has worked to inspire interest in our coastal wetlands and the biodiversity they support. Each year, its Shorebird Centre at Pukorokoro, on the Firth of Thames, attracts thousands of visitors. Author Keith Woodley, as centre manager, has been involved in all aspects of the Trust and its work. In his absorbing and often moving book - part history, part memoir - he charts the life and times of this tiny but mighty voluntary organisation. It's the story of how, driven by the importance of coastal conservation and that of its birdlife, a group of passionate and dedicated people built something from nothing, creating a globally recognised hub for shorebird protection and advocacy - all from an obscure rural corner of a little country at the bottom of the world. 'Keith Woodley serves as a kind of Gandalf of the estuarine wonderland of the Miranda shorebird colony, an all-knowing birding wizard who is alert to its magic in this fresh and always fascinating history.' - Steve Braunias

Dr. Obiero Ong'ang'a and Dr. Charlotte Anyango Ong'ang'a, a dynamic father-daughter duo, bring a wealth of expertise and knowledge to their respective fields.

Dr. Obiero Ong'ang'a, as the Founder and Executive Director of OSIENALA (Friends of Lake Victoria) and Radio Lake Victoria 92.1 FM, has dedicated his career to environmental conservation and community development. With his extensive background in Management, Entrepreneurship, Strategic Planning, Grant Writing, and Business Strategy, he has made significant contributions to the preservation of Lake Victoria and the sustainable development of the region. As an accomplished author, his book "Lake Victoria: Ecology, Resources, Environment" stands as a testament to his deep understanding of the subject matter.

Dr. Charlotte Anyango Ong'ang'a, with a Ph.D. in Linguistics, brings her expertise as an Educator and Career Development Specialist. With a strong background in teaching and conducting linguistic research, she has a profound understanding of textual analysis, discourse analysis, pragmatics, and semantics. Her dedication to supporting students in their job search needs has empowered many individuals to navigate the complexities of the professional world. Together, Dr. Obiero Ong'ang'a and Dr. Charlotte Anyango Ong'ang'a combine their diverse areas of expertise to create a powerful synergy. Their shared passion for education, career development, and environmental conservation drives their work, making a lasting impact on individuals and communities alike.

The Fires Next Time / Christoff, Peter

Melbourne University Press, Australia 2023

336 pages, 23cm

9780522879421

\$ 45.00 / null

470 gm.

Australia's Black Summer Fires

Following a three-year drought and during the hottest and driest year on record, a flume of scorching air set the Australian continent aflame. The Black Summer fires were unprecedented. Over six months in 2019-20 they burned more than 24 million hectares of Australia's southern and eastern forests - one of the largest areas burnt anywhere on Earth in a single event. The fires killed 33 people and 430 more died as an indirect consequence and they caused unfathomable harm to native species. Their economic ramifications were extensive and enduring.

State and federal governments and communities were under-prepared for that inferno and its many impacts. Yet global warming is increasing the likelihood of such events. The Fires Next Time offers a comprehensive assessment of the Black Summer fires. Its contributors analyse the event from many vantage points and disciplines - historical, climate scientific, ecological, economic, and political. They assess its impacts on human health and wellbeing, on native plants and animals, and on fire management and emergency response. They consider whether reactions could have been different, and what is needed to improve our handling of future bushfires.

Bungo Range: Biodiversity and Community / Gabriel Tonga Noweg, Faisal Ali Anwarali Khan & Jongkar Grinang (Ed)

UNIMAS Publishers, Malaysia 2023

264p.

Includes Index

9789670054445

\$ 47.50 / null

400 gm.

This book highlights the significant findings from the Multidisciplinary Expedition in Bungo Range conducted on 5-10 December 2017. The expedition was organized by the Institute of Biodiversity and Environmental Conservation, UNIMAS with support from the Forest Department Sarawak. This volume is illustrated in 24 chapters covering the historical exploration of Bungo Range, a geological feature of the mountain, water resources, aquatic biodiversity, floristics, mammals, birds, reptiles, amphibians, insects, and health and socio-economics of the Tringgus community. It is reported herewith in the book that there are a total of 313 species of plants mainly orchids and zingers, and 298 species of wildlife, among them 105 birds, 39 mammals, 92 insects, 27 reptiles, 17 amphibians, and 59 aquatic lives. Additionally, the use of natural resources by the local community in Tringgus is also presented. This book can serve as a useful reference for the development and management of Bungo Range National Park, and the communities living surrounding the area.

Modern Trends And Challenges In Research Of Marine Biodiversity Resources / Siti Azizah Mohd Nor, Tengku Sifzizul Tengku Muhammad & Thirukanthan Chandra Segaran (Eds)

Penerbit UMT, Malaysia 2023

xvi, 194p.

Includes Index

9786297625089

\$ 29.50 / null

450 gm.

This book is aimed at sharing our experiences and research activities at the Institute of Climate Adaptation and Marine Biotechnology (ICAMB), Universiti Malaysia Terengganu. Through targeted sampling of our natural biodiversity, intensive laboratory and rigorous statistical analyses we share a glimpse of the vast potential of our biological resources in supporting our wellbeing, from food security to health. Unfortunately, our biological resources are negatively impacted by severe anthropogenic and climatic disturbances. Here, we also introduce basic molecular concepts in population genetics and molecular taxonomy (DNA Barcoding) that are critical knowledge in addressing some of these challenges to ensure the survival of these resources.

\$ 195.00 / HB

1200 gm.

The Arabian leopard is an IUCN-listed critically endangered animal. This shy and enigmatic animal is close to extinction; experts estimate that there are as few as 100 left in the wild. The Arabian Leopards of Oman by Dr Andrew Spalton and Hadi Al Hikmani brings together previously unpublished scientific data and camera-trap photography which captures the secret life of the wild animals of the remote and inaccessible Dhofar Mountains Chain and tells the story of Oman's vital conservation work that hopes to bring this unique and elusive creature back from the brink.

The Wild Mammals of Oman / Barbara Golachowska

Royal Court Affairs General Directorate of Veterinary Services, Oman 2019

132p.

9789996908514

\$ 180.00 / HB

900 gm.

This is an ordinary album about extraordinary animals. This book is the result of my many years' work among wild animals: observing them and hunting for them by means of my photo camera; hunting for moments worth immortalizing in the frame of the lens.

The life of animals is my passion. As a veterinary doctor, I make sure to not only take care of their health but also to understand their behaviours and welfare. The photos presented in this book show wild animals, both the lazy and relaxed species and the excited and fierce ones. I tried to document and demonstrate their beauty, regardless of their size or the emotions they evoke. The wild mammals living in the beautiful Oman are really extraordinary, so feel welcome to take a look at this ordinary album, where you can see all of them together, on equal photographic terms. I hope you will enjoy it!

Dhofar, the southern province of the Sultanate of Oman, has a remarkably diverse landscape, unlike any other in Arabia. Sometimes known as the 'Land of Frankincense' for the ancient resin trade that fed the Roman Empire, Dhofar is famous also for the khareef – the summer monsoon that supports lush tropical woodlands and tall grasslands. This book, the first comprehensive account of the region, brings together spectacular and rare images with an exhaustively researched text that describes the landscape, climate, flora, fauna and people.

Kimberley monsoon rainforests / Kenneally, Kevin F.

University of Western Australia Publishing 2023

184 pages, 23cm

9781760802677

\$ 52.00 / null

610 gm.

The plant communities of the Kimberley, including Australia's tropical rainforests, are the most biodiverse ecosystems of Australia and, in many ways, the least understood.

Since European settlement Australia has lost 27% of its rainforest. Today, there remains around 1,500 patches of monsoon rainforest, totalling 7,000 hectares, scattered across 170,000 square kilometres of the tropical Kimberley region of Western Australia. These rainforests are small, isolated and embedded within a mosaic of mostly flammable eucalypt savanna woodlands.

Mounting evidence of the Kimberley as a historical and significant centre of refugia warrants action from scientists, governments, conservation agencies, Indigenous landholders as well as local communities to protect and conserve its unique biota and the processes responsible for generating and sustaining it.

Kimberley monsoon rainforests: Islands in a sea of savanna presents a rich and comprehensive exploration of the unique biodiversity of monsoon rainforests found in the expansive Kimberley region of Western Australia. Distilled from almost 50 years of research by author Kevin F. Kenneally Kimberley monsoon rainforests is a must-have for anyone interested in the conservation of the Kimberley and the protection of Australia's unique natural landscapes.

'A valuable resource for everyone who lives, works or travels in the Kimberley, pulling together all of the available knowledge of rainforest into one place.' - Catherine Goonack, Wunambal Gaambera Aboriginal Corporation

A Visual Guide to Philippine Flora / Maylene N. Soriano

Vibal Group, Inc., Philippines 2023

vi, 194p. ; 28cm.

9789710760688

\$ 35.00 / null

500 gm.

Few people, including Filipinos themselves, know that the Philippines is one of the world's most biodiverse countries. Aside from a wide array of animal species, the country happens to be home to over 3,500 endemic plant species and some 26 endemic genera. Of these, more than 3,000 are angiosperms or flowering plants, the largest and most diverse group of organisms in the plant kingdom. In fact, the Philippines ranks fifth in the world in terms of the number of plant species, playing host to five percent of the world's flora. More plants remain undiscovered since many areas and forests in the country have yet to be fully explored. Packed with colorful graphic illustrations and engaging activities, A Visual Guide to Philippine Flora, is a comprehensive and updated guide to the country's notable plant species. Apart from distribution, morphology, and other useful information such as edibility, medicinal and cultural value, and other economic uses, the book also highlights conservation efforts to preserve and protect our beautiful flora.

Flowers of Kenya: (Maua ya Kenya) Under the Dark Sky / Pomi Bahal

Pomi Bahal (Self-Published), Kenya 2020

138p.

9798211403772

\$ 55.00 / null

600 gm.

This book serves as a reference to an abundance of flowers from Kenya, my home. I started hand colouring black and white prints and eventually fell in love with colour. I was using slide film when I realised the fleeting beauty of nature and plants. When the digital era exploded, I was seldom seen without a camera, focusing on flowers and plants. These days, in my eighties, I am still focusing on the plant world but for convenience I mainly use an iPhone. The images are mostly from my garden and the immediate neighbourhood. I hope you gain as much enjoyment looking at the pictures in this book as I did creating it.
